

JOB POSTING

Biostatistician Position Available

JOHNS HOPKINS UNIVERSITY
CENTER ON AGING & HEALTH

DESCRIPTION

The **Johns Hopkins Center on Aging and Health** is seeking applicants who are able to perform statistical analyses for a number of research projects related to the health and well-being of older adults. Suitable applicants will hold a Master's degree or equivalent experience in Biostatistics, Epidemiology, or other social science or health related field. Successful candidates will **join a vibrant, collaborative hub of cutting-edge scientific research** that aims to inform and translate scientific advances into new and better models of clinical care and health promotion for older adults.

KEY DUTIES

- Conduct statistical analyses on funded research grants.
- Provide statistical consultation and analytical support for publications, presentations, and grant submissions.
- Some knowledge and experience with SAS, STATA, and/or R is strongly preferred.
